

Protector Smart Filter «Mini»

For smaller Heat pumps and underfloor heating systems.

- Removes impurities.
- Removes corrosion.
- Can be mounted horizontally or vertically.
- Combined filter and de-aerator
- Extends plant life.
- Protects boiler.
- Replaces micro-bubble separator.

The **Smart Filter Mini** magnetic filter is the best solution to solve contamination problems.

resulting from the presence of sludge in the circulation system.

This is especially important for scale, and rust particles caused by corrosion.

Using a powerful magnet combined with a cyclone filter action.

Smart Filter Mini collects all impurities in the system and prevents wear on the circulation.

pump and blockage of valves and heat exchangers in the system.

The impurities in the system accumulate at the bottom of the filter for easy removal.

The **Smart Filter Mini** is suitable for all heating and cooling systems.

Technical Data

Part No. 10.08.32

Connection 1"

Max Pressure 3 bar

Max Temperature 90°C

Part No. 10.08.31

Connection 3/4"

Max Pressure 3 bar

Max Temperature 90°C

Supplied complete with ball valve, filter insert, magnet and de-aerator.
Suitable for use with all chemicals including Glycol
